### **Vintage Amplifier Repair and Restoration - guaranteed**

I have personally repaired hundreds of valuable vintage amplifiers. I have passion about the construction techniques of the past. For legendary tone and reliability my formula is simple:

- Improve and document collectors value
- Make it sound like it just left the factory, maybe a little better
- Adhere to original construction techniques and mentality
- Maintain the customer as final judge of tone and quality

### **Vintage Restoration includes:**

Record condition, major component nomenclature and date codes

Determine originality and manufacture date

Vacuum, dust, debris, and spider webs

Inspect for damaged components and cold solder joints

Secure, clean, and verify all jacks and connectors

Clean, secure, and test potentiometer controls and switches

Test tubes, clean and retension tube sockets

Repair damaged components

Investigate and remedy customer complaints

Correct tolerance drift for authentic tone

Verify operating parameters to factory specifications

Record major operating parameters

Stress test

Hammer test

Secure, and verify speaker, baffle, and cabinet hardware

Cabinet, tolex and trim repairs as appropriate

Photograph and supply service records

Sound test with instrument

Sound test again

I have repaired and restored hundreds of valuable vintage tone machines. My expertise and consistent execution is well known among collector's and vintage tone enthusiasts. Call me today and let's talk about your vintage tone machine.
